

AYUSH SHARMA

Data Science / Data Analyst

+91 7206543544 · ayush.sh2177@gmail.com · Rohtak, Haryana · [LinkedIn](#) · [GitHub](#)

OBJECTIVE

Final-year CS student focused on data science and ML — I like taking a project from a messy dataset to a working model to something a non-technical person can actually use. Looking for a data science or analyst role to keep doing that.

TECHNICAL SKILLS

- Programming Languages: Python, Java, JavaScript, TypeScript
- Web Development: HTML, CSS, React.js, MERN Stack
- Python Libraries: NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, PyTorch
- Python Frameworks: Django, Flask
- Machine Learning / AI: Machine Learning, Neural Networks, Deep Learning, NLP, LLMs
- Data & Databases: MySQL, Excel, Power BI
- Tools: Git, GitHub, Jupyter Notebook, VS Code

PROJECTS

Customer Churn Prediction & Sentiment Analysis App | Python, Scikit-learn, NLP, Flask, PyTorch

- Compared Logistic Regression, Random Forest, and a Neural Network to predict customer churn.
- Added a TF-IDF/transformer sentiment layer and served real-time predictions via a Flask app.

AI Resume Analyzer & Summarizer | React (Vite), Node.js, Express, Gemini API

- Built a full-stack tool that parses uploaded resumes and returns structured feedback via the Gemini API.
- Built React/Vite frontend and Node/Express backend; deployed live on Vercel and GitHub Pages.

GraphOne Intelligence Pipeline | Python, Web Scraping, LLM Extraction, Entity Resolution

- Built a pipeline that scrapes web data, extracts structured fields via LLM, and resolves duplicate entities.
- Piped final structured output directly into a live Google Sheet via its API.

Interactive Personal Portfolio Website | HTML5, CSS3, JavaScript

- Built a responsive site from scratch with Flexbox/Grid layout, smooth scrolling, and project filtering.
- Cross-tested across browsers and screen sizes to confirm consistent mobile behavior.

EDUCATION

B.Tech in Computer Science, Maharshi Dayanand University — Expected Graduation: 2027

EXPERIENCE

Data Science Intern

Thiranex Edutech LLP · 1-Month Virtual Internship

Applied Python and ML fundamentals to guided data science project tasks.

Python Developer Intern

InternSpark · Virtual Internship

Built and debugged Python scripts and small applications as internship deliverables.

AI/ML Intern

Edunet Foundation · IBM SkillBuild x AICTE

Trained in AI/ML fundamentals and applied concepts through hands-on projects.

Data Science Intern

CodSoft · 1-Month Virtual Internship

Delivered ML projects spanning classification and regression on real datasets.

Data Analyst Intern

Oasis Infobyte · OIBSIP

Completed data analytics projects covering EDA, visualization, and reporting.

Data Analyst

Deloitte · Job Simulation

Practiced real-world data analyst tasks: data interpretation and business insights.

CERTIFICATIONS

- Oracle Agentic AI Foundation Associate (Aug 2026)
- TCS iON AI Foundation (Jul 2026)
- IBM Project Management Fundamentals (Jun 2026)
- HackerRank SQL Advanced (Jun 2026)
- Saylor University Python for Data Science (Jun 2026)
- TCS iON Young Professional (Jul 2026)
- IBM AI Fundamentals (Jun 2026)
- Cisco Networking Academy Python Essentials 1 (Jul 2026)
- University of Helsinki Elements of AI (Jul 2026)
- ISRO IIRS AI/ML for Geodata Analytics (Aug 2026)
